

Chisom Muorah

Front-end Web Developer

UTC +1 | +234(0)8162405121 | chisommuorah@gmail.com | chysomm.dev

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, TailwindCSS, Material UI, React, Redux, NextJS, Redux Toolkit, Formik, React Hook Form, React Toastify, Tanstack table, Yup, Tanstack Query, Redux Toolkit Query, Blocknote, EditorJs.

Tools & Platforms: Git, NPM, VSCode, Github, Netlify, Vercel, Jira, Figma, Postman.

Other Skills: API integration, Web Performance, State Management, Routing Code quality, SEO, CLI, Accessibility, Collaboration, Continuous Learning, Debugging, Time Management, etc.

RELEVANT EXPERIENCES

My Smart Business Card, mysmartcard.co

OCTOBER 2023 - PRESENT

Front-end Web Developer

- In our Next.js development workflow, we implemented and maintained a robust set of practices to enforce code quality standards and enhance development efficiency. We conduct thorough code reviews for every pull request, enforcing a strict style guide with ESLint and Prettier to ensure consistent code formatting. Leveraging TypeScript for static typing, we've achieved a 50% reduction in post-launch bug reports.
- Use of version control and CI/CD pipelines to streamline release management, resulting in a 20% improvement in development time.
- Collaborating closely with the design team using Google meet and Figma, I ensured the seamless translation of design concepts into responsive and visually appealing web interfaces. By implementing responsive design principles and prioritizing usability and accessibility, our web interfaces received positive feedback from clients and users in usability testing. This collaboration resulted in the delivery of web interfaces that not only met design expectations but also provided an optimal user experience across various devices.
- Helped to enhance the company's online presence by implementing SEO best practices like optimizing meta tags including title and description for each page, added keywords to URLs to improve search engine visibility and use experience, leveraged NextJs features like code splitting and server-side rendering to enhance page load time and general performance resulting in a 15% increase in organic search traffic within 2 months and achieving a better product for our customers.
- Successfully completed 8 important pages on the company's website within 3 weeks of coming onboard.
- Upgraded an old (NextJs 12) codebase to the latest version of NextJs (14) which has better features especially server side rendering and practically enhanced the loading time of the application by 30%.
- I implemented API calls using Redux Toolkit Query and Tanstack query to manage asynchronous data fetching seamlessly, I maintained the application state using Redux Toolkit, ensuring efficient state management and data flow throughout the application. For handling forms, I utilized Formik to streamline form development, enabling easy validation, submission handling, and form state management.
- Performed code optimization and refactoring to improve codebase efficiency, readability, and maintainability, resulting in enhanced performance and reduced technical debt.

Business Process Technologies, bptechng.com

NOVEMBER 2021 - SEPTEMBER 2023

Front-end Web Developer

- Transformed Figma designs into responsive web pages using React and relevant frameworks, ensuring pixel-perfect implementation and adherence to design specifications.
- Consumed API endpoints to ensure proper functioning of web applications.
- Performed code optimization and refactoring to improve codebase efficiency, readability, and maintainability, resulting in enhanced performance and reduced technical debt.

HNG Internship

AUGUST 2021 - OCTOBER 2021

Front-end web developer intern

- Transformed Figma designs into responsive web pages using React and relevant frameworks, ensuring pixel-perfect implementation and adherence to design specifications.
- Collaborated with other developers using tools like zoom for meetings, GitHub for code management thereby learning about teamwork and collaboration on projects as a front-end web developer.

Zuri Training

MARCH 2021 - JULY 2021

Front-end web developer trainee

- Trained on best industrial practices of a software developer.
- Trained on using front-end development tools like React in creating responsive and scalable web pages.

EDUCATION

University of Nigeria - *B.Sc in Microbiology*

2017
